

Manchester Skull Course Feedback 2023

General

1=poor; 5= excellent

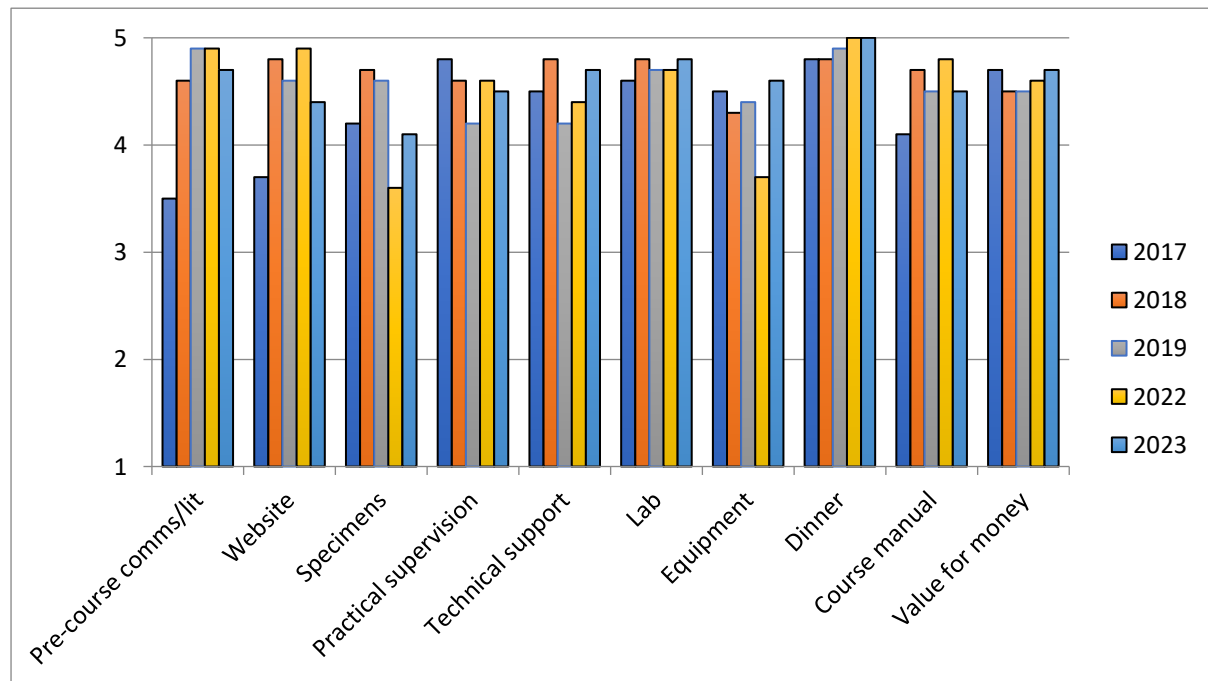

Lectures

Scores all excellent.

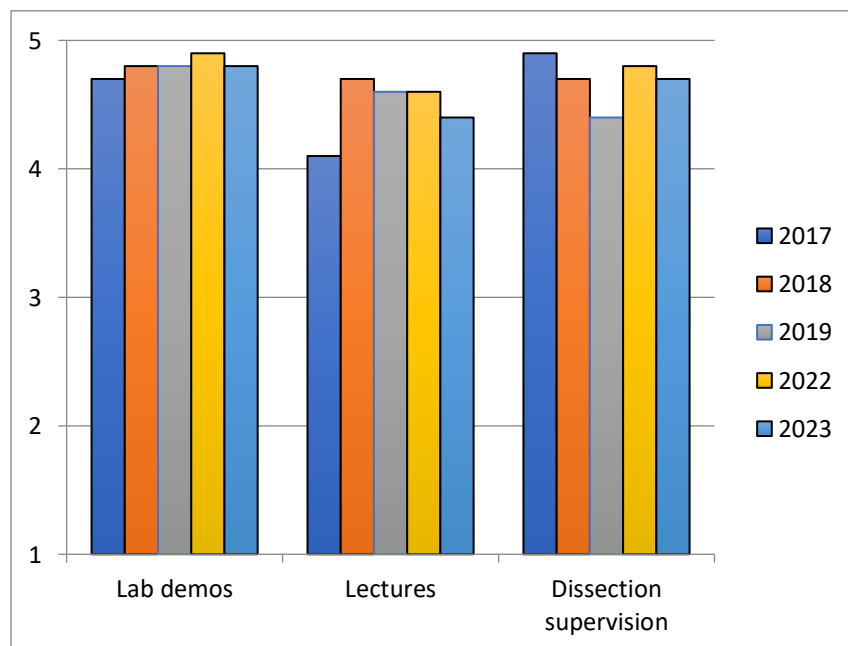

83% of delegates said the number of lectures was just right. 8% wanted more lectures. 8% wanted fewer lectures.

Course Organisation

Generally high scores this year. Specimens were criticised by a couple of people. I thought they were generally good. I will give people an option on the booking form to have injected heads so they have a choice although I suspect, given how expensive they are, that not many will go for it. The dinner was especially successful and worked well on the Monday. I forgot to send out the course manual in advance and didn't get it printed this year. I'll make sure I send it out beforehand next time.

How Useful Were The Following Teaching Methods

Strengths

Awesome dinner

Amazing MSSSC staff. So helpful

Reps

Injected specimens were brilliant

Lovely and accessible faculty

Supervisor availability

Everything

Length, depth, equipment, faculty, multidisciplinary, one participant per specimen

Faculty were enthusiastic to teach and concerns at dissection table

A lot of time for dissection

Excellent supervision

Availability of every tool

Presentations outstanding

Weaknesses

Day 5 faculty support limited

None x4

Further comments

Lovely faculty

Thank you

Lovely MSSSC staff

Well organised course

Beautiful demonstrations

Wonderful faculty

Best and most advanced course I have ever attended

Ver very happy overall
